EDUCATION

Sahyadri College of Engineering and Management, Mangalore **2023 - Present**
B.E. in Computer Science (Artificial Intelligence & Machine Learning) **CGPA: 9.44**

EXPERIENCE

MResult Technologies **Jul 2026 - Present**
AI Software Engineer Intern — Python, FastAPI, PostgreSQL, Docker, React.js

- Engineered a proprietary AI platform, building core features and modules from scratch for automated intelligence and data processing.
- Developed efficient, reusable, reliable, and scalable software REST APIs to support machine learning workflows and database integration.
- Maintained existing features and collaborated closely with software developers to develop the best implementations for production-ready applications.

Mantexia Solutions **Jan 2026 - May 2026**
AI / Backend Engineer Intern — Python, FastAPI, REST APIs, SQL

- Developed scalable backend services from scratch for enterprise AI-driven applications.
- Designed REST APIs integrating machine learning model inference and database services while continuously improving performance.
- Collaborated using version control and Agile methodologies to debug, troubleshoot, and resolve issues in production environments.

PROJECTS

DeepEval Studio – Intelligent Deep Learning Experiment Tracking **Aug 2026**
Python, FastAPI, Streamlit, TensorFlow/Keras, Scikit-learn, SQLite, Plotly, Docker

- Built a production-grade MLOps platform to train, benchmark, and compare multiple deep learning models, integrating an intelligent Copilot for automated performance analysis.
- Engineered scalable experiment tracking and hyperparameter optimization workflows, delivering interactive visualizations and AI-powered recommendations.

VeriUnlearn – Enterprise Machine Unlearning & AI Governance **May 2026**
Python, FastAPI, React, TypeScript, PostgreSQL, Redis, Celery, Docker, PyTorch, LangChain, Qdrant

- Engineered a production-ready platform implementing GDPR-compliant Machine Unlearning with secure deletion workflows, integrating an end-to-end RAG pipeline for AI-assisted compliance.
- Developed efficient microservices with asynchronous task processing and containerized the application alongside monitoring tools for highly reliable enterprise deployment.
- Built an interactive frontend dashboard from scratch featuring analytics, governance reports, trust scores, and real-time system monitoring.

CyberRakshak — *Python, FastAPI, PostgreSQL, Docker* **Feb 2026**

- Developed an AI cybersecurity platform by building modular microservices and containerizing the deployment for distributed execution.
- Designed scalable data processing pipelines for security event analysis, integrating AI inference services via backend REST APIs.

Kaushalya-Setu — *Next.js, TypeScript, Node.js, MongoDB* **Nov 2025**

- Built an AI-assisted career platform delivering personalized recommendations and automated profile generation for users.
- Developed scalable backend APIs and database services for student-industry matching, designing reusable frontend components.

Culling AI — *Python, OpenCV, PyTorch* **Oct 2025**

- Developed an AI-based image ranking system utilizing computer vision architectures for automated image quality assessment.
- Built preprocessing and feature extraction pipelines, optimizing workflows to efficiently process and categorize high-volume datasets.

TECHNICAL SKILLS

- **Core & Fundamentals:** Java, Python, Data Structures, Algorithms, Object-Oriented Programming (OOP)
- **AI & ML:** PyTorch, TensorFlow, LangChain, Hugging Face Transformers, OpenAI APIs, RAG, Scikit-learn
- **Backend & DBs:** FastAPI, REST APIs, Node.js, PostgreSQL, MySQL, MongoDB, Qdrant, SQLite, Redis
- **Frontend & Tools:** React.js, Next.js, Streamlit, Docker, Git, GitHub, Postman, Celery, Prometheus, Grafana

LEADERSHIP & ACHIEVEMENTS

First Place
Atharva ’25 Hackathon

Top 15 Finalist
Skill Sangam ’24 Hackathon

Selected for
Smart India Hackathon 2026

Joint Secretary
Dept. of Computer Science
